- Delivery, Unboxing, and Installation
- World Class 24/7/365 Customer Service

WHY CHOOSE LOGISTICS PLUS?

We provide outstanding value-added logistics and supply chain services through cost-effective operational modeling, planning, efficient execution, unparalleled visibility, and exceptional project management.

Our teams gained a deep understanding of this industry through our experience in transporting hundreds of thousands of pieces of equipment through various transportation modes. We build solutions and model those customized options to empower our clients to make the best supply chain decisions. We create charter, partial charter, commercial air, ocean, and a variety of hybrid transportation solutions that consider both our client's needs and the up-to-the-minute complexities facing the logistics industry. Decision factors on the client side may include plug-in capacity, transport speed, current mining revenue value, and unit pricing. While on the logistics side factors such as air and ocean capacity and pricing, most direct routing, and hybrid routing to maximize value and limit cost can all be critical variables in the decision-making process with tangible financial benefits.

- **Experience:** Helping our customers, both large and small, grow and succeed in every facet of logistics since 1996.
- **Expertise:** Dedicated project planners, managers, and logistics specialists who understand the supply chain needs of the cryptocurrency mining equipment supply chain.
- **Reach:** Access to our established worldwide network of freight carriers, installation service providers, and flexible warehouse locations.
- **Reliability:** 100K+ of cryptocurrency mining equipment transported and delivered on-time with a claim-free ration of over 99.5%
- **Passion For Excellence™:** We care and find a way to "yes" in everything we do.
