- Transportation and Freight Management
- Warehousing, Fulfillment, and Installations

People, Technology and Solutions

Logistics Plus, Inc. (LP) is a *21st Century Logistics Company™* and a global leader in transportation, warehousing, fulfillment, logistics, business intelligence, technology, and supply chain solutions.

LP is a top 100 3PL company, a top freight brokerage and warehousing firm, a top technology developer, a unique solutions provider for key verticals such as solar, data centers, and many others, and a certified Great Place to Work®.

Since 1996, the company has continued to help its clients adapt to a changing world. LP says “yes” to any supply chain challenge. Combining its passionate workforce with world-class technology, LP is agile, creative, clever, and resourceful.

A Global Leader by Example

Outside of the U.S., Logistics Plus has been actively building its global footprint and capabilities with new or enhanced offices in Australia, Brazil, China, Egypt, England, France, Germany, Ireland, Japan, the Netherlands, Poland, the Philippines, Scandinavia, Singapore, Thailand, and Vietnam.

Over the past two and a half years, LP has also provided Ukraine with a critical lifeline for rebuilding as the war with Russia rages on. The company has donated and raised more than \$1 million worth of relief and has provided vital transportation and logistics support to assist with Ukraine’s infrastructure and economic stability.

LP’s support for Ukraine is driving a meaningful impact on the global stage—a call to action for other businesses to continue to invest in and support the country as more safe zones are created.

“We’re trying to lead by example,” explains Berlin. “I call it the tip of the shovel. We’re willing to go in before others are willing to go in. If others see, maybe they’ll join in and start digging too.”

Passion for Excellence

“Logistics is in our DNA,” says Jim Berlin, LP’s Founder & CEO. “When I founded Logistics Plus over 28 years ago, I wanted LP to be the company with a *passion for excellence* and to put the ‘plus’ in logistics. We’ve always seen ourselves as a global solutions provider, which continues to take us in newer and exciting directions.”

Some of those new directions include significant investments in warehousing and fulfillment. LP now has nearly 10 million square feet of warehousing in North America alone, with additional locations worldwide.

Technology has also been a significant investment area as the company routinely develops custom TMS, WMS, and business intelligence (BI) solutions for its clients.

You can find all of LP’s people and locations at logisticsplus.com/directory.
